- **Advanced Managed E-Mail Defence System Providing:**
- Advanced high performance in-line Virus Scanning Engine. Filtering occurs at the Internet level protecting your corporate network from known virus threats and other unwanted malicious content. In-line message streaming with near zero latency message delivery (your data is not stored to disc whilst filtering meaning no delivery delays). Advanced multi-layered SPAM filtering engine, typically prevents 98% of SPAM from entering your network.
- **Web Stats with:**
- Web based statistical visitor analysis and reporting service
View statistical information about visitors to your site
- **£345 per year** ⇒ [ORDER HERE](#)
